

Modular Programming Lesson 3 (Month 3)

① The difference between `merge()` and `concat()`

git-Bash !

① - standalone Git Bash (kattaroq ekran)

② - git-Bash 'in VS code (kichikroq ekran)

Virtual environment !

Install python ≥ 3.6

`python --version`

`python -m venv myenv`

`myenv`

`source myenv/scripts/activate`

`pip install`

`pip list`

`pip freeze > requirements.txt`

`pip install requirements.txt !`

Data extraction !

- Ask permission

- `www.transfermarkt.com/robots.txt`

- giving citation/reference.

Data extraction

pros: unique dataset / models.

cons: time-consuming.
